Wishing you all a safe, healthy and happy holiday season

What is the best way to take notes?

Taking notes is very difficult for many kids. For many of our Remote Learners this has been the first time a teacher has requested them to take notes and they are not sure what to write down.

- Explain to your child that whenever the teacher on the video writes something on the whiteboard, they need to stop the video and write it down!
- Some of our students write down the questions and the answers so they have the information they need for the unit test.
- Some students are using different colored pencils/pens to draw and label their math problems, and/or their maps in social studies.

All students were provided with color pencils. Use them to add to your notes!

Parents/guardians ask to see your child's notes. Make suggestions. Are they organized? Are they readable? Do they include vocabulary words?
